

Bradford Engineering B.V., a Bradford Space subsidiary, is a Netherlands based supplier of Attitude and Orbit Control Systems (AOCS), Propulsion, Avionics and Thermal solutions for spacecraft. Our expertise in the field of satellite propulsion covers the entire range from cold gas, gas feed systems for electrical thrusters, to chemical propulsion. To lead our projects, we are seeking a:

PROJECT MANAGER

For the satellite product lines of

BRADFORD ENGINEERING

We are looking for a Project Manager to join Bradford Engineering B.V., a Bradford Space subsidiary, based in the Netherlands and manufacturer of products for the space industry.

Your role

The Project Manager manages all aspects of the programs and acts as a primary point of contact for Customers and is leading the Core Teams (System Engineer and Product Assurance Engineer), while fostering our company strategy (OnTime/OnQuality/OnCost).

The role involves a considerable variety of tasks amongst which, planning of activities, preparation of proposals, managing project administration, evaluating and managing the oToQoC performance of the projects under your responsibility, and reporting to the leadership team on a monthly basis.

The Project Manager is primarily responsible within Bradford Engineering B.V. for the execution of commercial, technical, operational and quality policies related to the satellite product lines portfolio, as well as it may include support to world-wide business development activities.

Key responsibilities Project Manager

- The Project Manager manages Customer requirements in line with the contractual agreements in terms of Compliance, Risk, Schedule, Quality and Cost (Budget).
- The Project Manager is, for the total duration of one or multiple projects, responsible for planning, contact with the Customer, definition of the program, quality and profitability in lieu of the oToQoC philosophy.
- The Project Manager directly supervises the project or product core team according Bradford's procedures specifically related to the Project Management tools.
- The Project Manager is pro-actively engaged to continuously improve the overall project performance in line with the KPI's.
- The Project Manager is the responsible for preparing proposals, involving core team members for specific expertise area's or volumes.
- The Project Manager is responsible in terms of monthly status reporting during the Project Status Review.
- Support the Direct Manager with competent and effective organization by selecting,

training, appraising, developing and motivating of the product core team System Engineers.

- The Project Manager is up to date in relation to competitor product development & performance: understands market requirements for current & future products and delivers roadmap input.

Essential skills

- Minimum three years' experience in a Project Management role in space industry
- Experience in management of multiple projects simultaneously
- Experience in financial management and reporting, including familiarity with ERP and planning software
- Strong communication skills, ability to reflect and knows how to motivate others
- Proficiency in (technical) English (C2)
- Intermediate in Dutch (B1)
- Master or Bachelor degree in Aerospace Engineering or Mechanical Engineering
- Driving license and willingness to travel

Strongly valued/desired skills

- Experience in the spaceflight industry, preferably as a satellite equipment supplier
- Knowledge on the current technology status and market related to spaceflight components

What we can offer in return

We offer a varied job in an exciting industry where you play a big part, in the provision of innovative solutions for satellites on a global market, with a generous number of holiday days and a very international working environment.

Duty station

Heerle, the Netherlands, with occasional travel needed (Heerle is located few minutes from Roosendaal and Bergen op Zoom, 30 minute drive from Breda and Dordrecht, and 50 km from Rotterdam and Antwerp). Possibility to live in Belgium while working at Bradford.

The role is open to candidates of any age, gender, orientation, that have or can get work authorization within the EU.
